UI Developer opportunity is available at an exciting and growing company!

Snapfinger, Inc. – Alpharetta, GA 30005

Snapfinger Inc., the leading provider of integrated remote ordering and pre-payment solutions for the restaurant industry. We are pushing the limits of restaurant technology with our industry-leading online ordering platform. Our team of technology aficionados is looking for another member who is interested in a fast-paced environment where you can develop innovative software. This position is for someone wanting to define new solutions that will continue to change online ordering for restaurants.

What you'll be doing

You'll be working for an exciting, innovative, and fast growing company in the Atlanta area. As a UI Developer on our team, you will have a strong experience in developing cutting-edge GUIs. We're looking for someone that can bring a strong UI vision and develop high-quality software at a fast pace. More than any other quality, we are looking for those driven by the challenge of solving unique and difficult technical problems, those who excel when given creative freedom, and those who aren't afraid to dive into new territory (technical or otherwise) and learn something new. You should have a good sense of product design and be willing to work in self-organizing teams. In addition, you will:

- Design, develop, and implement mission critical web applications using MVC framework and modern UI technologies and patterns
- Transform design mock-ups into cross-browser compatible HTML/CSS layouts and implement dynamic page elements using JavaScript, JQuery, and Ajax.
- Participate in design discussions regarding layout and the use of dynamic elements.
- Work closely with project/product managers to meet timelines and create new requested features.
- Be responsible for iteratively and incrementally improving both products and processes.
- Communicate effectively verbally and through written documentation to present findings and recommendations to team members.

What you need to qualify

- Minimum of 5 years working with large scale XHTML, CSS and JavaScript applications
- 3-5 years of work experience with MVC Frameworks such as rails, grails, spring mvc, struts, yii, symfony, .NET MVC.
- Extensive knowledge in responsive design, mobile platforms, cross-browser capabilities and coding techniques.
- Extensive experience creating semantic, cross-browser web and mobile layouts using CSS, HTML, and JavaScript
- Experience w/ modern web UI development tools: SASS + Compass or Bourbon, CSS3, HTML5 (semantic layout and HTML5 APIs)
- An eye for good design and solid understanding of web usability and standard practices
- Broad knowledge of available web development technologies, frameworks and libraries
- Demonstrated self-motivation and organizational skills

What we offer

- Collaborative, close-knit environment in Atlanta, GA
- Working with a really smart and fun group of people on solving BIG problems for an emerging industry
- Competitive salary based on talent and experience

- Flexible hours
- Relaxed Dress code
- In addition to vacation and sick days, you get your birthday off
- $50 food allowance each month
- 401k, Medical, Dental, Other Benefits Available
- Work on a platform that supports tens of thousands of restaurants in multiple countries!

So if you're an experienced UI Developer within the technology industry and have a desire to work for a rapidly growing business with significant opportunities for professional growth, apply today!

We are a proud Equal Opportunity Employer. Applicants are considered for all positions without regard to race, color, religion, sex, national origin, age, disability, marital or veteran status.
