

## **Senior .NET Developer opportunity is available at a terrific company with an incredible outlook!**

### **Snapfinger, Inc. – Alpharetta, GA 30005**

Snapfinger Inc., the leading provider of integrated remote ordering and pre-payment solutions for the restaurant industry, is looking for someone with a minimum of six years in .NET development developing scalable, reliable and robust transactional web-based products. Experience with restaurant point of sale systems is highly desired.

#### **What you'll be doing**

You'll be working for an exciting, innovative, fast growing company in the Atlanta area. Your primary responsibility will be working with a team of BA's and Developers to deliver products built to meet requirements for Snapfinger's online and mobile food ordering solutions, which allow customers to place take-out orders at restaurants. You will,

- Play a lead role in establishing a robust, scalable, and flexible technical architecture and make recommendations for improvements.
- Work in a variety of software disciplines, and must be able to work with Business Analysts and Developers to refine product requirements and deliver products built to these requirements.
- Provide your extensive hands-on technical expertise coupled with ingenuity and leadership skills to help the team achieve the desired business outcome.
- Use your experience storyboarding, prototyping and developing complex technical solutions to best solve business requirements.
- Provide expert level of programming, design, analysis, and mentoring.
- Be responsible for iteratively and incrementally improving both products and processes.

#### **What you need to qualify**

- 6 + years in .NET development role with proven experience in developing scalable, reliable and robust transactional web-based products.
- BS or above in Computer Science or related engineering field or equivalent education-experience.
- Must be highly proficient in a majority of the following domains:  
.NET, asp.net, MVC, WFC, MS SQL, C#, TFS, AJAX, XML/XSL, JavaScript, VB Script, Web Services, SSL, HTTP, Web Application Security, Performance Tuning, Platform Configuration/Tuning, Load Balancing, Clustering, and Web Farms.
- Extensive experience with formal software development methodologies and processes.
- Expert knowledge in object oriented design concepts, service architectures, and application development using relational databases.
- Must have exposure to complete product life cycle, with formal training or experience in software revision control and test methodologies.
- Extensive technology and/or industry knowledge is preferred, especially in the area of researching new and emerging technologies to realize development or product cost efficiencies.
- Ability to provide leadership and communicate effectively verbally and through written documentation, meetings and presentations to local and off shored team.
- Results oriented and readily demonstrate comprehensive use of formal software development methodologies to achieve the desired business outcome.

**What we offer**

- Collaborative, close-knit environment in Atlanta, GA.
- Working with a really smart and fun group of people on solving BIG problems for an emerging industry.
- Competitive salary based on talent and experience.
- Flexible hours and relaxed dress code.
- In addition to vacation and sick days, you get your birthday off.
- \$50 food allowance each month.
- 401k, Medical, Dental and other benefits are available.
- Work on a platform that supports tens of thousands of restaurants in multiple countries!

If you're an experienced .NET Developer and have a desire to work for a rapidly growing business with significant opportunities for professional growth, apply today!
